

Gaurish Bangera

Mangalore, Karnataka — +91 7204348970 — gaurishbangera8970@gmail.com
LinkedIn: linkedin.com/in/gaurish-bangera191a8831b — GitHub: github.com/gaurish676

PROFESSIONAL SUMMARY

Computer Science & Engineering undergraduate at NMAMIT with a strong foundation in Data Structures, Algorithms, and Software Development. Experienced in full-stack web application development, custom compilers, and machine learning using Go, Python, React, and SQL. Certified in Microsoft Azure AI Fundamentals with proven research and industry internship experience.

EDUCATION

NMAM Institute of Technology, Nitte, Karkala

Expected May 2027

Bachelor of Technology (B.Tech) in Computer Science & Engineering

TECHNICAL SKILLS

Languages: C++, Python, Go, Java, C, JavaScript, TypeScript, SQL

Web Development: React, Node.js, HTML5, CSS3, RESTful APIs

Databases & Tools: MySQL, PostgreSQL, XAMPP, Git, GitHub, VS Code

Core Competencies: Data Structures & Algorithms (DSA), Object-Oriented Programming (OOP), Machine Learning, Compiler Design, DBMS

INTERNSHIP EXPERIENCE

NITK (National Institute of Technology Karnataka) — Research Intern, RGB-T Vision Portal Project

2026

- Designed and developed the RGB-T Vision Portal, an interactive web platform presenting thermal-visible computer vision research, methodologies, and experimental results.
- Integrated research documentation, interactive simulations, multi-modal datasets, and project insights to streamline findings for researchers and academic collaborators.
- Engineered responsive UI components using modern web technologies to visualize complex vision data and experimental workflow pipelines.

NativeSoftTech — Web Development Intern

June 2025 – July 2025

- Developed dynamic, responsive web interfaces and reusable user components adhering to modern HTML5, CSS3, and JavaScript standards.
- Collaborated on client-facing frontend features, optimizing page layout responsiveness, cross-browser compatibility, and performance.
- Refactored frontend code modules to enhance code maintainability and user engagement metrics.

CodSoft — Data Science Virtual Intern

June 2025 – July 2025

- Conducted data preprocessing, exploratory data analysis (EDA), and feature engineering on structured datasets.
- Implemented predictive machine learning models to analyze data patterns and evaluate algorithm performance using statistical metrics.

PROJECTS

Intelligent Contact Management System

Go, React, TypeScript, PostgreSQL

- Architected a full-stack contact management application using Go for high-concurrency backend services and React + TypeScript for a responsive interface.
- Designed relational database schemas and optimized PostgreSQL queries for fast CRUD operations, full-text search, and soft-delete/restore functionality.
- Engineered REST APIs following Clean Architecture principles to guarantee code maintainability and system scalability.

Compiler for Hypothetical Language

Python, Compiler Design, LR Parsing

- Built an SLR(1) parser and execution engine for a custom mini programming language, executing lexical analysis, parsing, and syntax evaluation.
- Computed FIRST/FOLLOW sets and constructed LR(0) state machines, resolving parsing table conflicts for deterministic syntax evaluation.
- Implemented runtime handling for conditional branching (if/else), variable assignments, and expression evaluation.

Smart Insurance Cost Prediction

Python, Machine Learning, Scikit-Learn

- Developed an end-to-end machine learning pipeline using Kaggle insurance datasets to predict health insurance premiums based on user attributes.
- Performed exploratory data analysis (EDA), feature scaling, and categorical encoding; benchmarked Random Forest, KNN, and Linear Regression models.
- Evaluated model performance using standard regression metrics (R^2 , RMSE) to select the optimal model and deployed a prediction script.

Online Quiz Platform

JavaScript, HTML/CSS, MySQL

- Developed an interactive web application featuring custom quiz creation, timer tracking, and automated scoring mechanisms.
- Engineered an administrative control panel integrated with a MySQL backend to manage question banks and analyze performance data.

Staffroom Finding Website

HTML5, CSS3, JavaScript, MySQL

- Developed a web platform aiding students in locating faculty staffrooms and navigating campus facilities efficiently.
- Curated and integrated a Previous Year Questions (PYQs) repository for academic reference and resource sharing.

ACHIEVEMENTS & CERTIFICATIONS

- Microsoft Certified: Azure AI Fundamentals (AI-900).
- Technical Learning: Completed C++ Professional Certification from Infosys Springboard; attended Microsoft Azure Studio webinars.
- Competitive Programming: Active problem solver on LeetCode and TakeUForward (TUF) focusing on Data Structures & Algorithms.
- Workshops & Recognition: Participated in Nestle E-Learning Sustainability workshop; received Appreciation Certificate from Tudar Club.
